Fellows Attend Round Table and HydroVision

During the week of July 18th, the 23 Fellows joined the Hydro Research Foundation in Sacramento to attend the Hydro Fellows Roundtable and HydroVision.

During the week the Fellows attended a Hydro Basics session, a marketing power educational session and tour of Western Area Power Administration's Operations Center, and a tour of Folsom Dam. During the conference the fellows presented their final findings, updates and introduction for new research topics. HydroVision provided an incredible opportunity for the Fellows to be introduced during the opening keynote session.

Throughout the conference the Fellows had a booth in the exhibit hall where they were able to connect with industry experts and have an opportunity to talk about their research. This valuable week provides each student a tailored opportunity to expand their knowledge base and interact with industry.

The Foundation would like to thank the following sponsors for helping support the program during this very special week:

PennWell Corporation	National Hydropower Association
HCI Partners	United States Bureau of Reclamation
Hydro Performance Processes, Inc	Weir American Hydro
M.J. Sale and Associates	Western Area Power Administration
